

IN THE SPECIFICATION

Please add the following new paragraph after the end of the paragraph starting on page 2, line 10:

The Figure illustrates an example of an iron with an exchangeable reservoir for containing an additive composition.

Below please find the Abstract on a single page free of extraneous material:

The invention relates to a composition to improve wrinkle resistance in fabrics, comprising: a wrinkle-reducing active ingredient, comprising at least one fusible elastomer and cross-linked particles, and a liquid carrier for carrying the active ingredient. The invention also relates to a wrinkle-reducing active ingredient as used in such a composition and a cartridge for an iron containing such a composition.
